

New Life

Give -

To put into the possession of another
for his or her use

Remember:

to recall something to mind or become
aware of something that had been
forgotten

To put that in perspective, according to Computerworld magazine, Yahoo – the Internet giant – has created a specially-built 2.0 petabyte “data warehouse”. Yahoo uses the immense information storage capacity of this data warehouse to analyze the behavior of its half-a-billion monthly visitors. “It is not only the world’s single-largest database, but also the busiest”

Yet Yahoo's 2.0 petabyte computational center which can process 24 billion "events" a day, is a full 20 percent smaller than the capacity of a single human brain which is 2.5 petabyte.

Average adult human brain has the ability to store the equivalent of 2.5 million gigabytes digital memory.

That is more capacity than on 39,062 smart phones

Peter answered, "The Christ of God."
